Filed: August 12, 2003

For: **MOTORIZED SYRINGE  
PARTICULARLY USEFUL FOR  
INTRA-UTERINE INSEMINATION**

Group Art Unit: 3767

Attorney Docket: 26253

Examiner: Andrew M. Gilbert

Mail Stop: Amendment  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450**ELECTION**

Sir:

This is in response to the United States Patent and Trademark Restriction Office Action mailed April 10, 2007, which response is being made on or before May 10, 2007, and for which no extension of time fee is due.

Applicants hereby elect **Group II**, namely **Claims 19 and 21-22**, drawn to a method of delivering a drug preparation into a subject's body comprising introducing to a vagina of a female a motorized syringe containing a semen preparation in an expandable-contractible chamber, introducing a flexible catheter tube connected to said syringe, and energizing said motorized syringe to deliver said semen preparation to the uterus at a slow rate for a prolonged period of time measured in hours.

Applicants reserve the right to file, at a later date, additional divisional applications claiming priority from the present application which are directed to the non-elected Group.

Respectfully submitted,

Martin D. Moynihan  
Registration No. 40,338

Date: May 9, 2007
